OBJECTIVE

- A dedicated and skilled IT professional with expertise in web development and backend technologies, seeking to contribute to a forward-thinking organization. Eager to leverage my comprehensive skill set in HTML, CSS, JavaScript, Python, Django, and more to drive innovation and deliver exceptional results while fostering professional growth and career advancement.

SKILLS

- **FrontEnd:** HTML,CSS, Bootstrap, Javascript, React.js,wordpress
- **BackEnd:** Python, Django,
- **Database:** MySQL
- **Database Management:** PHPMyAdmin **Others:** Json,Rest Api
- **Version Control System:** Git
- **IDE:** Sublime Text, VS Code
- **API Client:** Postman

EXPERIENCE

Mashupstack

Thiruvananthapuram, India

Intern Trainee

Jun 2025 - Jan 2026

- DuringmyPython fullstack internship, I developed web applications using Mysql, Javascript, React.js, PythonandDjango. I designedReact.jsinterfaces,builtRESTful APIswithPythonandDjango,and managed databases in Mysql. I collaborated on Git and GitHub for version control and participated in code reviews, enhancing my full-stack development skills and problem-solving abilities.

PROJECTS

Favorite-Hospital Appointment Booking - FullStack

Tech used: React, JavaScript, HTML, CSS, Python, Django REST API, Redux, Axios, Bootstarp

- **Overview:**Developed a full-stack Hospital Appointment Booking System using a React frontend and a secure backend. The application enables patients to register, authenticate, view doctor profiles, book and manage appointments, and update account details. An admin portal allows hospital staff to manage doctors, users, appointments, and generate reports such as most-viewed doctors. The system features a responsive UI, secure authentication, optimized performance, and scalability for future enhancements.
- **Key Features:**Secure user login, doctor discovery, appointment scheduling, admin management, and reporting in a scalable system.
- User registration and secure login, detailed doctor profile listing, online appointment booking and scheduling, appointment history and cancellation management, user reviews and ratings, and admin management with reporting and analytics.
- **Git repo:**<https://github.com/dennis142505/mainproject.git>

URL Shortner- Django

Tech used: Django, Bootstrap, JavaScript, HTML, CSS, ..

- **Overview:**The URL Shortener is a web application built using Django that allows users to convert long URLs into short, easy-to-share links. When a user clicks the shortened link, they are redirected to the original URL. The system also tracks the number of clicks for each shortened link.
- **Key Features:** User authentication, URL shortening, automatic redirection, user dashboard, click tracking, URL management, unique short code generation, and creation date tracking.
- **Git repo:** <https://github.com/dennis142505/urlshortner.git>

Daily Water In take(React)

Tech used: React, JavaScript, HTML, CSS, Bootstrap

- **Overview:** The Daily Water Intake Tracker is a React-based web application that helps users record, track, and monitor their daily water consumption. It allows users to log the amount of water they drink each day, prevents duplicate entries, and displays their intake history in an organized list.
- **Key Features:** User login, daily water entry with auto date, one entry per day limit, intake history list, and a clean Bootstrap-styled responsive interface.
- **Git repo:** <https://github.com/dennis142505/water-intake.git>

EDUCATION

Manonmaniam Sundaranar University	-	-	-
BCA in Computer Science			2022 - 2025
GHSS School			
St. Aloysius Higher Secondary School			
Marthandamthurai			2021 - 2022

CERTIFICATIONS

- Full Stack Web Development in Python//Django/React from MashupStack -2026
